

CREATING PEACE OF MIND AROUND BOT-DRIVEN CYBER THREATS FOR IDAC SOLUTIONS

ABOUT IDAC SOLUTIONS

iDAC Solutions use EV Charging, Smart Buildings Solutions, IT Cabling and Fire Safety to help you create healthier workplaces which are more energy efficient.

They collaborate with you and their expert technology partners to design a solution tailor-made to meet your current and future needs.

They also transform your business by creating sustainable environments that grow with you – offering scope for the future and operational cost benefits throughout the lifecycle of the building.

RESULTS

Over the last 4 months, The Veracity Web Threat Protection solution **blocked 69% of traffic to the IDAC website identified as malicious bots.**

“I was very naive and didn’t think we were the type of business that would be a target to a cyber-attack as we don’t carry any sensitive data, but I was wrong. I thought what we already had in place was sufficient but I was very surprised at the level of bots on our site, before we had Veracity’s Web Threat Protection.”

Paul Cattell, Managing Director

iDACS
WORKING SMARTER

“Veracity have left me with the confidence that I no longer have to be involved because they are managing it for me.”
